

Blood donor unit

Flexible tapping

With HMK Bilcon's **Mobile blood donor unit**, you get a flexible tapping unit that brings blood donation closer to the donors' daily lives. It makes the blood donor unit more accessible and can help increase the amount of blood donations and encourage more people to give blood regularly. The mobile blood unit is equipped with all necessary medical devices and equipment making it safe and secure for the donors while meeting all hygienic requirements. The unit is constructed with 63 mm fiberglass-reinforced polyester panels, which form both the outer and inner lining produced according to the "sandwich" principle to ensure great strength and good insulation.

Optimized interior design

The blood donor unit can be set up anywhere, and when the sides are extended, a 67 m² bright and inviting room is obtained. There is room for seven donor beds in the unit as well as a kitchen, toilet, interview room and waiting area. The space is optimized and the best prerequisites are present for both donors and health personnel who have to work in the unit. It provides great comfort and a good working environment.
