

Fuel tank transferral

Quality that pays off

With HMK Bilcon's **fuel tank transferral**, you get to extend the life of your tank, as the tank lasts for many more years than the chassis of your tank truck. It can therefore easily pay off to transfer and reuse the tank. The production time for a transfer is around 6 weeks, depending on the condition of tank and equipment, while it takes a minimum of 12 weeks to build a brand new fuel tank truck.

Saves you time and money

With a fuel tank transferral you will save both production time and money, as it is cheaper to make a transferral compared to a new built fuel tanker truck. Before we start making a transfer to a new chassis, we always review your current vehicle. Here we agree whether you want to continue with the equipment already mounted on your tanker, or whether you want an upgrade of hoses, pumps and control system etc. During the construction process, we may come across components that should be replaced. We always have a dialogue about that to let you know what we have replaced.

BENEFITS

OPTIMIZED SOLUTION

LOW WEIGHT

HIGH QUALITY AT A LOWER PRICE

LONG PRODUCT LIFESPAN

FAST DELIVERY

GREAT USER-FRIENDLINESS
