

Liquid tank trailers

Quality that pays off

HMK Bilcon is the distributor of **liquid tank trailers** for liquid content from the Spanish manufacturer Parcisa in Denmark, Norway, Sweden, Finland, the Faroe Islands, Iceland, and Greenland. The tank trailers are made of stainless or acid-resistant steel, and we provide the product at a competitive price. As a distributor, we also offer service for the tank trailer, ensuring you have a familiar Danish partner for maintenance.

Transportation of various products

The tank trailers are optimized for use in the Nordic markets and can be used for transporting ADR, chemicals, food, oils, alcohol, waste products from slaughterhouses, and the fishing industry. The tanks can be built on two-, three-, or four-axle chassis and can be delivered with or without external insulation depending on the requirements. They are equipped with well-known high-quality components, ensuring high reliability in the tanks. Additionally, they can be supplied with various heating options, such as oil heaters on the structure or waterborne from the tractor.
