

Mammography screening unit

Mobile screening clinic

The HMK Bilcon mammography screening unit is equipped as a fixed clinic in a hospital where focus has been put on the patient's perception of visiting the trailer being similar to visiting a clinic in a hospital. The unit is highly mobile and can be positioned anywhere a standard trailer can go.

We have designed the mammography unit with focus on functionality and ease of use. A trained person can make the mobile unit ready for patients within 20 minutes. It is made up of 55 mm glass fiber reinforced polyester panels, which form outer and inner clothing made according to the "sandwich" principle, to achieve great strength and insulation.

Ergonomic and effective

The screening unit is very spacious with a floor space of 34 m². The interior of the unit can be designed to meet your requirements e.g. with an examination room with a screening unit, staff room, changing room, waiting area and kitchen and toilet facilities.

You have the opportunity to lease the mammography screening unit through us at an advantageous low interest rate with a fixed monthly fee as we work with Danish and Scandinavian leasing companies.

Benefits of HMK Bilcon's mammography unit:

- Easy access to users
- Easy set up
- User-friendly
- Flexible interior design
- High resale value

Mammography screening unit
