

Megospace M

Mobile training trailer

With HMK Bilcon's **Megospace M**, you get a spacious trailer that is manufactured and carefully tested according to our high quality standards. Our design of the trailer is based on our extensive industry knowledge and many years of experience in creating customized solutions. We have placed particular emphasis on functionality and ease of use during the development, which means that it takes only 20 minutes for a trained person to set up the trailer. The trailer is constructed with 63 mm fiberglass-reinforced polyester panels, which make up both the outer and inner cladding produced according to the "sandwich" principle to ensure great strength and good insulation.

Flexible layout

The trailer is extremely flexible and can be transported and set up anywhere. When setting up, the sides can be easily extended by remote control giving a total room of 92 m². This makes the trailer ideal for use at exhibitions and events, just as it can be used for emergency operations by emergency services. The interior of the trailer can be customized to your wishes and can include air-conditioning, underfloor heating, toilet facilities, networks, AV systems, and much more. We also offer the option of mounting solar panels on the trailer to minimize power consumption and supply the trailer with power during parking.

BENEFITS

HIGH QUALITY

FAST SETUP

DELIVERY ON TIME

FLEXIBLE INTERIOR DESIGN

LONG LIFETIME

UP TO 3 YEARS WARRANTY

Megospace M

Mobile training trailer

Dimensions

| | Internal | External |
|-------------------------------------|-------------------------|------------------|
