

# Megaspace M container

## Mobile exhibition container

The HMK Bilcon Megaspace M container is a solid portable container, manufactured and tested according to our high quality standards. The exterior can be personalized with your company photos, slogans and logos to fit your target groups and segments.

We have designed the container with focus on functionality and ease of use. A trained person can make the container ready within 15 minutes. The container is built as a standard 40 feet container made up of 55 mm glass fiber reinforced polyester panels, which form outer and inner clothing made according to the "sandwich" principle, to achieve great strength and insulation.

## Flexible interior design

The container can be easily transported and set up anywhere. When set up, the pods are easily expanded with a remote control, giving a total of 55 m<sup>2</sup> floor space suitable for teaching, seminars and courses. The interior design of the trailer is made according to your wishes and may include airconditioning, floor heating, kitchen facilities and much more.

You have the opportunity to lease the Megaspace M container through us at an advantageous low interest rate with a fixed monthly fee as we work with Danish and Scandinavian leasing companies.

## Benefits of HMK Bilcon's Megaspace M container:

- High quality
- Fast setup
- Delivery on time
- Flexible interior design
- Long lifespan
