

# Mobile hospital

## Fully functional hospital on wheels

The HMK Bilcon mobile hospital is a very compact hospital built to correspond to a stationary hospital with all its functions and facilities. It consists of six Multispace trailers and a fixed semitrailer, working as a docking unit. When the trailers are docked together it is possible to walk from one trailer to the other without going outside. This ensures that nothing is affected by the surrounding conditions and that staff safety is very high.

We have designed the mobile hospital with focus on functionality and ease of use. A trained person can make the mobile unit ready fast. The trailers are made up of 55 mm glass fiber reinforced polyester panels, which form outer and inner clothing made according to the "sandwich" principle, to achieve great strength and insulation.

## Intelligent interior design

Each trailer has a floor space of 71 m<sup>2</sup> with several bright rooms comfortable for both patients and staff. They are equipped with airconditioning, dimmable lights, fixed power outlets, bedside gas panels, bathroom with toilet and shower etc.

You have the opportunity to lease the mobile hospital through us at an advantageous low interest rate with a fixed monthly fee as we work with Danish and Scandinavian leasing companies.

## Benefits of HMK Bilcon's mobile hospital:

- High quality
- Industry-optimized solution
- Low weight
- Delivery on time
