

Rigid tank trucks

Quality that pays off

With HMK Bilcon's **rigid tank trucks**, you get optimized and durable vehicles for the transportation and distribution of oil and gasoline. We specialize with over 50 years of experience in constructing rigid tank trucks and aluminum structures. Our focus is on continuous product development, optimized solutions, safety, and user-friendliness. We exclusively use materials and components of the highest quality for our rigid tank trucks, ensuring their long-lasting durability.

User-Friendly SafeCon® III fuel delivery control system

We have developed our own fuel delivery control system SafeCon® III, which is installed on our rigid tank trucks. The system is user-friendly and easy to operate, reducing the risk of misuse and operational issues with the tank truck. Integration with various office systems is possible with our OTC solution, ensuring seamless order processing for both drivers and office personnel.

With HMK Bilcon's rigid tank trucks, you get more than just transport of fuel. You also get a reliable and efficient solution that meets the highest standards in safety, user-friendliness, and durability.
