

Roadshow trailer

Showroom with truck simulator

With HMK Bilcon's **Roadshow Trailer**, you get a solid trailer that is manufactured and thoroughly tested according to our high quality standards. We have designed the trailer based on the customer's specifications and our extensive industry knowledge and many years of experience in creating specialized solutions. This trailer is set up as a classroom for Transportens Udviklingsfond, which focuses on recruiting young people for freight transport. Inside the trailer, there is a truck simulator with a screen, allowing interested individuals to try out the profession of a driver. Emphasis is placed on functionality and user-friendliness, and it takes only 20 minutes to set up the trailer for a trained person. The trailer is constructed with 63 mm fiberglass-reinforced polyester panels, which form the exterior and interior cladding made according to the "sandwich" principle, achieving high strength and insulation.

Spacious and flexible

The trailer can be easily transported and set up anywhere. When the trailer is set up, there is a 34 m² showroom that is highly suitable for exhibitions, training, seminars, product presentations, and courses. The interior layout of the trailer is customized according to your wishes and can include air conditioning, underfloor heating, toilet facilities, network, AV systems, and much more.
