

Mobile Medical Clinic

The mobile medical clinic comes to the patient

HMK Bilcon's mobile medical clinic you will get a portable medical unit equipped as a medical clinic in a hospital or a doctors. The mobile medical clinic can be used as a blood donor unit, a testing clinic for corona-virus or doping testing. The unit is built in to a semitrailer which can be transported and positioned anywhere a normal truck can go. It is perfect for reaching patients in local areas.

We have designed the mobile medical clinic in collaboration with medical hospital departments in Denmark, Sweden and Switzerland with emphasis on functionality and user-friendliness. A trained person can make the mobile unit ready within 15 minutes. It is made up of 55 mm glass fiber reinforced polyester panels, which form outer and inner clothing made according to the "sandwich" principle, to achieve great strength and insulation.

Intelligent and flexible interior

The unit can be easily transported and set up anywhere. When set up, the pods are easily expanded with a remote control, giving a total of 67 m² floor space. The interior is very bright and comfortable for both donors and staff. It is a spacious workplace with a good working environment and well-designed ergonomic conditions.

Benefits of HMK Bilcon's mobile medical clinic:

- Easy access to users
- Easy set up
- User-friendly
- Flexible interior design
- Long lifespan

Mobile Medical Clinic
