

Rigid tank trucks

For more than 50 years HMK Bilcon has supplied specially designed vehicles for transporting oil and gasoline in Scandinavia, the Faroe Islands, Iceland and Greenland. Focusing on continuous product development, individually optimized solutions, usability and safety, we are one of the leading suppliers of customized vehicles for the oil industry.

Individual solutions

We specialize in building tank trucks and aluminum constructions. Based on the needs of each customer we design transport solutions that are optimized in terms of economy and use which comply with applicable laws and directives in this area.

Long product life and high resale value

We only use materials and components of the highest quality which ensures a long life of all our products. Therefore, the resale value of our tank trucks is among the highest in the market for used vehicles.

Increased user-friendliness with SafeCon

We have developed our own control system SafeCon to insure that operating the tank truck is as easy as possible. The system makes the operation of the truck very simple and reduces the risk of operating errors.

Benefits of HMK Bilcon's rigid tank trucks:

- Individually optimized solutions
- High quality and a long product life
- High resale value
- User-friendly
