

Trailers

Stable and reliable trailers

With HMK Bilcon's trailers you will get solid and reliable trailers perfect for off-road driving in connection with military assignments in the field. The trailer is made on a strong hot-dip galvanized steel chassis in order to carry heavy loads. It is equipped with pneumatic brakes and can be painted after your specifications.

Based on our knowledge and years of experience in building defense equipment we have designed the trailers to meet high requirements for ease of use, volume and maneuverability and of course our solutions comply with all legal requirements.

Flexible design

The trailer can be used as a generator trailer when electricity is required in the field or as a trailer for transport of additional equipment. We can manufacture trailers in different designs in ½ tons, 1 ton or 3 tons.

Benefits of HMK Bilcon's trailers:

- High quality
- Industry-optimized solution
- Fast startup
- Long lifespan

Trailer
